

Motive Offshore.

Traction Winch Spooling.

Traction Spooling.

Motive Offshore offers a comprehensive traction winch spooling service to the oil and gas; offshore renewable and marine industries.

Established in 2010 we manufacture high quality marine equipment for sale and rent. The Company offer a solutions based service, using our collective expertise to design and implement the most cost effective solution for your requirements. Our team have extensive experience in the industry and can respond quickly to all your project requests.

All of our equipment is manufactured and serviced in our workshop in Aberdeenshire where we also offer a comprehensive design and build service for any client who would prefer to purchase rather than rent.

Personnel

Motive Offshore can provide qualified personnel for all project requirements. Our Operators are highly experienced and able to oversee spooling projects from start up to completion.

Personnel can be hired as part of a comprehensive spooling package or we can also provide competent mechanics and hydraulic engineers for maintenance, servicing and repair work to other hydraulic equipment.
